

340B Prescription Plan

Are you tired of paying too much for your prescriptions?

Keystone Rural Health Consortia, Inc. can help. We have teamed up with two local pharmacies to offer discounted pricing on all medications. Through the federally funded 340B Drug Pricing Program, we can purchase nearly every drug at reduced costs, which means we can pass the savings on to you!

Our participating pharmacies include: Rite Aid in Emporium, Pa. and Moshannon Valley Pharmacy in Snow Shoe, Pa.

Prices may vary, but 90-day supplies of many medications are available for a considerably lower cost! There are no income requirements to qualify.

How do I get started?

First you must be a patient at any of our Keystone Rural Health Consortia, Inc. locations.

- Your KRHC provider can send the prescription directly to your pharmacy using their computers. Electronic prescriptions are quicker & safer than handwritten prescriptions.
- You can bring a handwritten prescription from your provider directly to any participating pharmacy.

Are all drugs included?

Virtually all medications are included and qualify for the cost savings. You can even purchase discounted over-the-counter items at the pharmacy with a written prescription from your doctor.

Can I transfer existing prescriptions?

Yes! You may choose to transfer any existing prescriptions. However, the prescription must be written by a Keystone Rural Health Consortia, Inc. provider in order to qualify for the 340B Drug Pricing Program. All other prescriptions will be filled at your local participating pharmacy: Rite Aid in Emporium, Pa. or Moshannon Valley Pharmacy, in Snow Shoe, Pa.

To transfer your prescriptions, contact your nearest participating pharmacy and provide the staff with your prescription number(s) and the name of the pharmacy where the prescription was previously filled. Their friendly staff will easily arrange the transfer for you.

What are my payment options?

If your insurance includes pharmacy coverage, your co-pay will be the same. If for any reason your medication is not covered by your insurance or you do not have insurance, you can qualify for Sliding Fee discounts.

To enroll, complete a Sliding Fee application at any Primary Health Network location or visit our Sliding Fee page for more details.
